Title: Academic Staff Position (Assistant Professor) Openings

Department: Department of Life Science, University of Hyogo

Outline:
Academic staff position for assistant professor in the field of structural physiology (electron microscopy) has been opened. The applicant will have a talent and enthusiasm for education and research in a relevant subject area. He/She will be expected to develop his/her own research project in cooperation with Professor Miyazawa at the Laboratory of Cellular Structural Physiology.

Content of works:
(1) Research as mentioned in “Outline”.
(2) Education and teaching:
   Education for undergraduate school: Basic and advanced training course for experiments of cell biology, molecular biology and biochemistry.
   Education for graduate school: Teaching and research training at the laboratory of Cellular Structural Physiology.
   Teaching ability both in Japanese and English is required.

Qualifications:
(1) Candidates have completed their Ph.D. or doctoral degree.
(2) Candidates will have a distinguished research record and an enthusiasm to carry out research and teaching in a relevant research field.

Research field: Biology / Electron Microscopy

Job type: Assistant Professor, full-time, fixed-term (5-year, reappointment is possible)

Starting date: 1 October, 2016

Application materials:
(1) Cover letter
(2) One copy of Curriculum Vitae
(3) One copy of List of Publications
(4) A copy of three selected papers
(5) An outline of research achievement and plans for future research and education (within 1,000 words)
(6) List of acquired grants
(7) Names and contact information (address, telephone number and E-mail address) of two references

The above submitted application materials will not be returned and used only for the purpose of applicant screening.

Selection process: Review of application forms and interview

Closing date for applications: 20 June, 2016

Sending application materials:
Professor Masao Sakaguchi
